

Legal notice about Covid-19

- Due to the spread of the respiratory disease COVID-19, there are various official orders in the home country and the booked holiday country as well as at the airports and on the aircraft, e.g. to be observed with regard to hygiene and distance.
- There must be an obligation to wear (medical) mouth and nose protection, increased controls and restrictions on departure / entry (e.g. mandatory self-reports on health status, contact and stay and possibly mandatory tests for COVID-19 to identify sick travelers) as well as the ordering of quarantine measures, which officially take place in local hospitals and local health centers.
- Please note that the entry requirements of a holiday country may differ depending on the departure country. If this booking includes accommodation, the service components we offer directly (e.g. restricted use of the pool, menu instead of buffet, etc.) may also be affected. In addition, there may be changes in the itinerary at short notice.
- Possible costs in connection with the implementation of generally officially ordered Covid-19 tests or penalties for violations of official hygiene and distance rules are to be borne by the traveler. Without a corresponding Covid Protect insurance, the individual traveler is obliged to take over medically ordered Covid-19 tests as part of medical treatment and to bear the costs of quarantine measures.
- It is strongly recommended to take out a special Covid Protect insurance as well as a valid international health insurance before departure. Please inform yourself regularly and shortly before arrival about the local regulations and hygiene measures of the travel countries, the respective airports and the specific regulations of the airlines and accommodations booked.
- Use the websites of the Federal Foreign Office (EU) or the embassies (CH), airports, airlines and hotels. We will provide you with information on accommodation in writing before the trip as soon as we have them.
- Please also note the information on the website of the Federal Ministry of Health in your country of origin, in particular the regulations for people entering Germany, which you can access at <https://www.auswaertiges-amt.de/de/quarantaene-einreise/2371468>. Answering health questions about COVID-19 is mandatory for travelers with Inner Journey GmbH.
